

MediCapture Inc. Opens New Production Facility
Expanded Manufacturing Capacity Meets Growing Demand for
MediCapture's Line of Digital Image Capture Solutions

St Petersburg, FL – August 12, 2005 – MediCapture, Inc., a leading supplier of digital medical image capture solutions, today announced that it is moving production of its MediCap™ family of image capture devices to a new, larger manufacturing facility in Taipei, Taiwan. The state-of-the-art facility includes complete component assembly lines along with a suite of comprehensive test equipment. It also contains advanced tooling machinery for developing and prototyping MediCapture's next-generation of image capture systems.

“We're pleased to be opening a custom-designed manufacturing facility in the center of Taipei's world-renown electronics manufacturing district,” commented Michael Bishop, MediCapture's President and CEO. “The additional production capacity will allow us to keep pace with rapidly increasing demand in our established North American and European markets, while helping us fill a surge of new orders from markets we've been aggressively developing in South America, Asia, and the Middle East.”

“We've also installed the industry's most advanced prototyping and test equipment,” added Mr. Bishop. “With our MediCap product line, we've built a reputation for quality manufacturing while maintaining a perfect certification record in all our global markets. Now with these new facilities, we're able to assure our loyal customer base that we'll continue the same high standards as we expand our product offerings and bring innovative new designs to market.”

MediCapture's MediCap image capture systems are available from authorized dealers in North and South America, Europe, Asia, and the Middle East. For a list of dealers, see MediCapture's web site at www.medicapture.com.

About MediCapture Inc.

MediCapture Inc. offers innovative digital medical image capture products that save time and money while improving patient care. The Company's patent-pending image capture technology allows customers to capture digital images from virtually any existing medical image device that has standard video outputs.
